

Demerits of Indian Education system

Education play important role in one's life. It affects our life from birth to death. So, there is a need to be strong in our education system. But, there is a lot of drawback to the Indian education system.

✓Lack of practical knowledge

Indian Education system judge students based on their academic performance and not on their overall practical performance.

✓No scope for other fields except studies

Right from the beginning, parents and teachers emphasize students for getting good marks. With time, many changes happened in our education system and the modern education system started.

✓Wrong learning method

When Students are incapable of understanding a concept then the teacher recommends "ratta mar" as a learning way.

✓Lack of funds and quality teachers

Many schools and colleges don't have enough funds to increase the quality of education and hence lacks the infrastructure facility, teaching environment and quality teachers.

HOW TO IMPROVE QUALITY OF EDUCATION

Maintained infrastructure

Well maintained infrastructure creates an environment to study

Focus on e-books

It's the digital era. So internet is the best way to gain new skills.

Extra curricular activities

An education system should be involved in various co-curricular activities that serve as a key component in sustaining students' interest in school and colleges.

Community building

Everyone come together irrespective of caste, religion, etc to share their ideas, challenges, and promotes cross-functional learning.

Proper implementation of govt. Initiatives

According to RTE, the student-teacher ratio should be 30:1 at the primary level and 35:1 at the secondary level. Anyhow we lack proper monitoring and evaluation to implement them on a large scale.

Govt. website: [Education.gov.in](https://education.gov.in)

Nothing should be secret!!

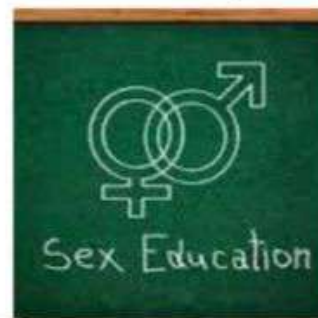

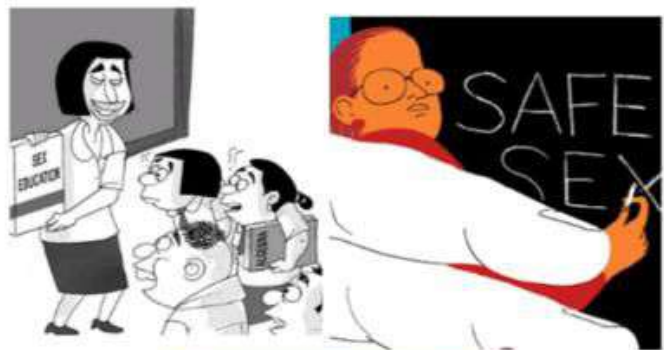

Why it is important

- It increases young people's knowledge and improving their attitudes and behaviour related to sexual and reproductive health.
- It helps in decreasing of STI/HIV infection rates.
- It improved social and emotional learning.

"Sexting"- Sex+chatting

Teenagers are creating and sending their own nude images and videos that resulted to violent and risky behaviours.

Primary duty of parents and teachers is to socialize and maintain healthy communication about sex with children.

Culture and Education

India is a country of diversity so, It is important for students to be taught about our cultural heritage. Through a proper understanding, a student will be able to connect and appreciate traditional cultural heritage and they will be able to apply it to their own life.

When anyone feels emotionally connection with their course and work, they often times feel more inspired to be creative and put a great deal of effort into their work.

The connection between culture and learning opens doors for exploring the world.

By learning and understanding the past mistakes, we can be sure to protect the future from making the same mistakes again and again.

It will also make us help to understand what went wrong, and then move forward into the future by doing things in a new way.

Culture and Traditions are the beliefs that are passed down from generation to generation So, They should be preserve to keep the ideals and concepts of a society.

Cultural education enables everyone to discover new ways of learning and communicating which are respectful to themselves as well as others.

Should Bhagvad Gita be taught in schools?

India is a land of diversity, Recently several states announced that the Bhagvad Gita will be taught in schools.

In the New Education Policy 2020, there is a direction to teach students about modern and ancient culture, traditions, knowledge systems, etc.

Favour Form:

The teachings of Gita will enable a person to take ethical decisions in life perfectly. It is followed worldwide by eminent personalities like Aldous Huxley, Mahatma Gandhi, etc.

Against form:

Gita is essentially a religious book and following it in school curriculum may pose a danger to the secular and democratic fabric of the nation. This issue is a highly sensitive one and may disturb communal harmony of the country. There is no proof to show guarantee of spiritual thinking in all the readers of Bhagvad Gita.

Gita is a philosophical book which may help students to develop good character but it will only happen

When the students respect the philosophy themselves. The forceful teaching of Gita does not let you eager well with the philosophy of Gita itself.

All religious books teaches how to live life and moral teaching included in all of that. Instead of making spiritual books compulsory for Students. It should be elective in nature so that interested student get benefitted from these books.

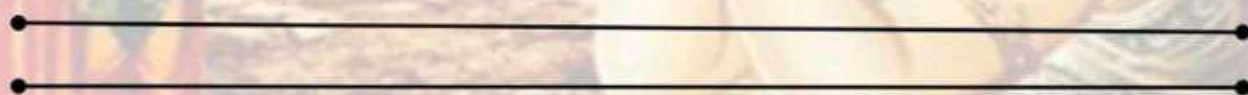

संन्यासः कर्मयोगश्च निःश्रेयसकरावुभौ ।
तयोस्तु कर्मसंन्यासात्कर्मयोगो विशिष्यते ॥

Both the path of karma sanyasa and Karma Yoga (working in devotion) lead to the supreme goal. But Karma Yoga is the superior karma sanyasa.

Benefits of reading the Bhagavad Gita:-

The shlokas of the Gita tell us about our duties as human beings.

Reading the Gita helps us understand the importance of self-control and how to practice it.
